PROFESSIONAL EXPERIENCE

Technomancer Inc. — Senior Website Designer / Web Developer

Feb 2019 – Aug 2026 | Philippines

- Designed, developed, maintained, and optimized responsive websites and web applications for multiple clients and projects.
- Delivered 100+ website projects and supported 30+ active client websites across WordPress, Shopify, WooCommerce, Laravel, and custom web environments.
- Built and customized WordPress and Elementor websites, including layouts, reusable sections, responsive behavior, forms, integrations, and content updates.
- Developed and maintained Laravel and Vue.js applications using modern front-end frameworks and utility/component libraries.
- Worked on Shopify and WooCommerce functionality, including product, checkout, booking, membership, payment, and store-related requirements.
- Troubleshot front-end, CMS, server, plugin, database, and deployment issues while coordinating fixes and project updates.
- Improved website performance and loading speed by up to 40% through front-end, asset, code, and configuration optimization.
- Used Git/GitHub, Composer, npm, Vite, cPanel, and VS Code as part of day-to-day development and maintenance workflows.

Kimbel International — Data Entry Staff / Network Administrator

Feb 2015 – Jan 2019 | Philippines

- Handled data entry, record maintenance, inventory-related information, and administrative support with attention to accuracy.
- Assisted with LAN/network setup, workstation troubleshooting, connectivity issues, and basic technical support.
- Maintained organized digital records and supported day-to-day office technology requirements.

SELECTED PROJECT EXPERIENCE

WordPress / Elementor Client Websites

Built and maintained responsive marketing, service, and business websites; handled layout implementation, content updates, responsive fixes, plugin configuration, and troubleshooting.

Shopify / WooCommerce Stores

Supported e-commerce builds and enhancements involving products, checkout behavior, Click & Collect, booking/membership requirements, payment integrations, and store functionality.

Laravel + Vue.js Applications

Developed and maintained custom web application interfaces and back-end functionality using Laravel, Vue.js, Inertia-style workflows, Tailwind CSS, Bootstrap, and MySQL.

UNESCO-IOC WordPress Portal POC

Worked on a WordPress portal proof-of-concept using WordPress, PHP, MySQL, JavaScript/jQuery, and responsive front-end implementation.

EDUCATION

2 Years, Information Technology — Mary the Queen College of Quezon City, 2013
